A CURIOUS MIND

Finding order in Chaos

A Physicist's Journey

FROM working with Richard Feynman at Caltech to recently winning the Dirac Medal, theoretical physicist Deepak Dhar in conversation with *TNIE's* **Tamreen Sultana** shares about his journey, experiences in research and what it takes to pursue science in India.

Q What sparked your interest in science?
When I was young, my father encouraged me to follow science. He would bring a British popular science magazine called 'Understanding Science', which was a bit expensive by Indian standards. Of course, it was in English. I had to first learn the language, and then to understand the concepts. Eventually, I became better in English, and also developed some interest in science.

Q You studied at Allahabad University, IIT Kanpur and then Caltech. How did these places shape your approach to physics and research?
All of these were very important in developing my understanding and knowledge of basic science. Caltech is certainly one of the world's best places for this kind of work, so I am very happy to have had the opportunity to learn there.

Q You worked with Richard Feynman at Caltech. What did you learn from him?
There were lots of things to learn from him, even just by watching him. The first thing I recall about him was that he was not very pompous and was very kind to students (unlike some other people we meet!). He was also able to explain things in very simple terms without using too much jargon. I learnt the importance of making sure that students understand something well. And the importance of constructive criticism, which helps them do better.

Q Is there a fundamental difference between doing a PhD in the US and India?
I don't think making a very general comparison between a PhD in the US and a PhD in India is very useful. There are some very good places in the US and there are lots of not-so-great places there as well. Similarly, there is considerable variation in the quality of institutions in India.

Certainly, the best universities in the US are better than the best in India. I do not think many Indians will disagree with this statement. But several institutes in India are very comparable to institutions among the top 50 in the US, though perhaps not the top five.

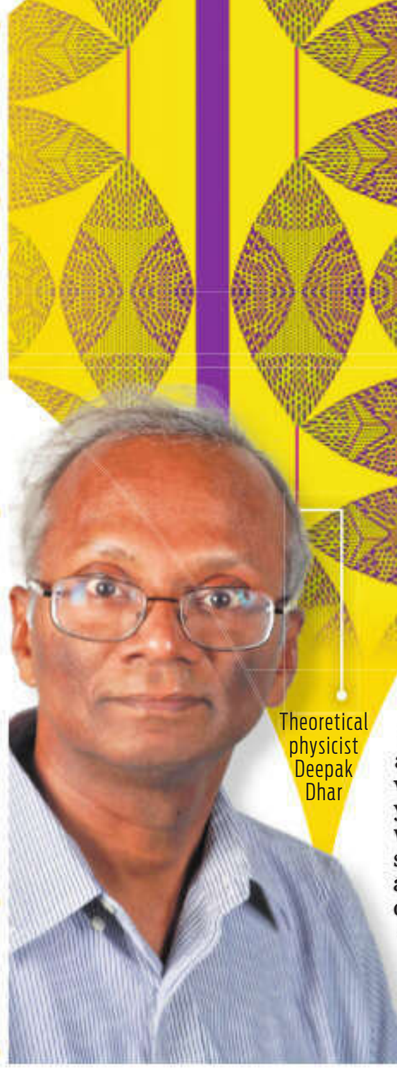

Q For a general reader, what is statistical physics trying to explain?
We know bulk matter is made up of lots of atoms, and predicting its properties helps us understand the world around us. In principle, knowing how individual molecules behave should let us predict what happens in a large amount of water, for example. But that is very difficult using exact equations of motion.

The advantage of statistical mechanics is that we don't need to know the exact state of every particle.

We can still reliably predict properties such as temperature, pressure and the behaviour of substances. In other words, it allows us to predict the properties of large numbers of particles even when we cannot predict each particle's individual behaviour.

Trail of Honours

- **1983 :** INSA Young Scientist Medal
- **1991:** Shanti Swarup Bhatnagar Prize
- **1993:** J R Schrieffer Prize
- **2001 :** S N Bose Medal
- **2002:** The World Academy of Sciences (TWAS) Prize in Physics
- **2022:** Boltzmann Medal – first Indian recipient
- **2022:** IIT Kanpur Distinguished Alumnus Award
- **2023:** Padma Bhushan
- **2026:** ICTP Dirac Medal

Theoretical physicist Deepak Dhar

Q Could you explain your widely recognised Abelian sandpile model in simple terms?
A property of the sand that is familiar to everybody is this: you take a pile of dry sand and add grains to it very slowly. When you add a grain, you cannot control its position very well. Sometimes the grain will simply sit on the pile. Sometimes it will move a little and settle there. Sometimes it causes a big avalanche. You may drop one grain, but 100 or 1,000 grains can come down.

What is happening is that you have a system which is being driven by adding grains, but its response is sporadic, irregular and burst-like.

Sometimes nothing happens and sometimes a large event occurs. This is not very periodic. The interval between events is random and not easily predictable.

These kinds of avalanche-like relaxations are what people were trying to understand. They made a model called the Abelian sandpile model.

I will not describe the model in great detail here, but what they could show was that the model had this basic behaviour: you add one grain, sometimes very little happens and sometimes a much bigger avalanche happens.

But this had only been shown using computer simulations. There was no theoretical way of predicting this behaviour. What I did was to show that you can define some quantities called addition operators.

In this model, these addition operators have the property that, if you take a configuration of sand and add a grain at one place A and then another, at place B, or add the grain at B first and then at A, the final configuration is the same after the avalanches are over, and sandpile has a stable configuration.

This property — that the final answer does not depend on the order in which you add the grains— is called the Abelian property. Using these properties, along with other properties of the model, various quantities could be theoretically calculated. This was the prototypical model of these kinds of driven systems, which are called self-organised critical systems. It was useful in helping us understand the general behaviour of such systems.

There are many other examples of such driven systems, such as earthquakes and solar flares and rain.

Q You are only the second Indian to receive the Dirac Medal. What does the recognition mean to you, and what were you doing when you learnt you had won it?
I am very happy to realise that some work which I did around 35 years ago is still remembered and recognised as important. That is a matter of some satisfaction. Whether it will help other physicists depends on what the future brings. *If the award helps convince the government to increase funding for science, then it helps. If it doesn't, then it doesn't help.* By itself, an award cannot improve research, but if it makes decision-makers change their priorities, then maybe it will help. Another possible positive effect could be that such awards may influence the career preferences of some promising young people.

WAXY BUSINESS

Hydrochar gets a natural carbon shield

A study by researchers at the Shenyang Agricultural University (SAU) in China has found a way to enhance carbon sequestration while remediating soil. They have found that a naturally formed water repellent coating on hydrochar applied on soil can play a role that has been hitherto overlooked in protecting carbon from chemical degradation. Hydrochar is a carbon-rich solid material produced by heating wet biomass or organic waste in water under moderate pressure and low temperatures, in a process called hydrothermal carbonisation that mimics natural coal formation and turns wet materials like sewage sludge or agricultural waste into useful fuel or soil additives without needing an energy-intensive drying step. The study examined hydrochar made from several common plant leaves. SAU found carbon from plant waxes and cutin forms a layer, helping hydrochar retain carbon in soil.

SALE NOTICE FOR SALE OF IMMOVABLE PROPERTIES

E-Auction Sale Notice for Sale of Immovable Assets under the Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 read with proviso to Rule 8 (6) of the Security Interest (Enforcement) Rule, 2002

Notice is hereby given to the public in general and in particular to the Borrower(s) and Guarantor (s) that the below described immovable property mortgaged / charged to the Secured Creditor, the **possession** of which has been taken by the Authorized Officer of Union Bank of India (secured creditor), will be sold on **10-09-2026 "As is where is", "As is what is" and "Whatever there is basis"** on the date mentioned below, for recovery of dues as mentioned hereunder to **Union Bank of India** from the below mentioned Borrower(s)& Guarantor(s). The Reserve Price and the Earnest Money Deposit are also mentioned hereunder:

Branch name, address & Contact Number	**UNION BANK OF INDIA, PIRAPPANCODE BRANCH,** Bldg. No.M.P.585, Pirappancode PO, Trivandrum 695607, **Mob: 9744719694,** or Authorized Officer at **PH: 7259040031**
Name of the Borrower & Guarantor/s:	**M/S. Alfa Wedding Centre** A Partnership Firm Represented by its Partners Mr. Ramesh Kumar C & Ms. Sureka T , at Door No. NP 6/155 , Vamanapuram, Venjarammodu P O , Trivandrum 695607, Mr. Ramesh Kumar C Partner of M/S. Alfa Wedding Centre Anagha Kavara, Venjaramood Nellanad Trivandrum 695607, **Ms. Sureka T** Anagha Kavara, Venjaramood, Nellanad, Trivandrum 695607, Mr. Ramesh Kumar C Anagha Kavara, Venjaramood, Nellanad, Trivandrum 695607, **Ms. Sureka T,** Partner of M/s. Alfa Wedding Centre, Anagha, Kavara, Venjaramood, Nellanad, Trivandrum 695607, **Ms. G.Kamalabai Alias Ms.Kamalabaignanasundaram,** House No.681, 2nd Cross Street, Asaripallam Road, Nesamony Nager, Nagercoil Kanyakumari, Tamilnadu 629001
Amount due	**Rs. 3,42,19,099.00** (Rupees Three Crores Forty-Two Lakhs Nineteen Thousand and Ninety Nine Only) outstanding **as on 06.08.2026** along with further interest and costs

PROPERTY DETAILS : All that part and parcel of **10.50 Cents** of land, Building and all other improvements thereon in Re Sy No. H-1/12-11A subdivided as H-1/12-11A 1B present Town Survey No H2/20, Door No. 23/5D, Assaripallam Road, **Neendakarai A East Village**, Nagercoil, Agasteeswaram Taluk, Kanyakumari District, Tamilnadu -629001 owned by **Mrs. G Kamala Bai alias Kamala Bai Gnanasundaram BOUNDARIES:** East : Property of Thangamani, South : East West Pathway, West : Plot No 70 belongs to Ms. Susila Rani, North : Rajapathai (Road).

Details of encumbrance if any known to the secured creditor: Nil (Indenting bidders are advised to verify the EC and satisfy themselves before submitting bid).

RESERVE PRICE	**Rs. 1,88,73,000.00** (Rupees One Crore Eighty Eight Lakhs Seventy Three Thousand Only)	BID INCREMENT : **Rs.1,88,730/-** (Rupees One Lakh Eighty Eight Thousand Seven Hundred and Thirty Only)
EMD	10% of the Reserve Price mentioned above.	

DATE & TIME OF E-AUCTION: 10-09-2026 BETWEEN 12.00 PM to 05.00 PM (with 10 minutes unlimited auto extensions) E-auction, website : https://baanknet.com

For queries contact Number: PH: 8291220220 & email ID: support.baanknet@psballiance.com

For Registration and Login and Bidding Rules visit Buyer Manual link provided in the home page of https://baanknet.com and https://www.unionbankofindia.co.in/auction-property/view-auction-property.aspx

For auction related queries e-mail to sarfaesi@unionbankofindia.bank or contact Chief Manager, Regional Office, 1st Floor, Statue, M.G.Road, P.B.No.307, Thiruvananthapuram, Kerala - 695001) , PH :9739806668, 9495590047

This may also be treated as notice u/r 8(6)/Rule 9(1) of Security Interest (Enforcement) Rules, 2002 to the borrower/s and guarantor/s of the said loan about the holding of E-Auction Sale on the above mentioned date.

GOLD AUCTION NOTICE

The pledges, in specific and the public, in general, are hereby notified that public auction of the gold ornaments pledged in the below accounts is proposed to be conducted at the following branches on 16/09/2026 from 10.00 am onwards. We are auctioning gold ornaments defaulted customers who have failed to make payment of his/her loan amount despite being notified by registered letters. Unauctioned items shall be auctioned on any other days without further notice. Changes in venue or date (if any)will be displayed at auction centre and on website without any further notice.

List of pledges:-
